

Saint-Hyacinthe, March 24th, 2020

Special announcement - COVID-19

The production of input necessary for essential sectors (agriculture among other) is considered an essential manufacturing activity

Dear customers, partners,

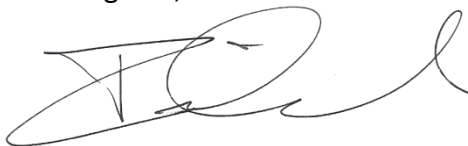

Last night the Quebec Prime Minister Legault announced that all businesses in Quebec must close until April 13th 2020, except essential services. A few hours later the Government of Quebec published a list of essential services and commercial activities (<https://www.quebec.ca/sante/problemes-de-sante/a-z/coronavirus-2019/fermeture-endroits-publics-commerces-services-covid19/>).

Thus, Probiotech International's activities which include the production of inputs for animal nutrition, are considered essential. **Consequently, our operations and activities are running normally.**

Since the beginning of January, Probiotech International Inc. has taken measures to ensure our ingredients supply in order to continue serving you in this insecure climate. Since March 12th of this year we have put in place procedures to protect the health and safety of our employees and their families. Therefore, we are ready to continue serving you in this moment of uncertainty.

For further information, please do not hesitate to contact us.

Best Regards,

Ivan Girard, Ph.D., PAS
President, R&D Manager
